

Corn Milling & Fructose Plant

Orhangazi, Turkey

Client

Cargill Tarim San & Tic a.s.

Value

US \$100 million

Completion

September 1999

Assignment

Construction Management

This plant will produce around 800 metric tons of fructose per day, plus various co-products including fibre, gluten and germ oil.

The initial pre-construction assignment lasted 12 months and included all preliminary works in order to manage the approval process. Bovis Lend Lease also monitored the development of the project, advising the Client on the building's function, land usage and time and quality targets.

Our responsibilities included:

- Updating the master programme and conceptual cost estimate
- Supervision of all civils activities, steel erection, cladding and roofing, vessel erection and underground fibre-glass pipework
- Assisting and advising on safety
- Preparation of monthly valuations for the package contractors
